IDNR—Division of Soil Conservation

Project WET & Hoosier Riverwatch Advanced Training featuring Healthy Water Healthy People

Healthy Water, Healthy People (HWHP), the latest program of Project WET uses innovative, interactive activities and materials to demonstrate critical water quality topics. The program provides educators with hands-on activities, water quality testing kits, training, and materials to investigate a broad range of water quality topics. Participants will receive the HWHP guide and Water Monitoring Test Kit Manual. You will also receive instruction using these publications with the HWHP test kits. The program encourages investigation of the connections between water quality and its relationship to environmental and human health.

**Participants will need to
bring own lunch.
Snacks will be provided.**

What is it all about???

Healthy Water, Healthy People Water Quality Educators Guide

This 200-page activity guide is for educators of students in grades 6 through university level. The purpose of this Guide is to raise the awareness and understanding of water quality topics, issues and their relationship to personal, public, and environmental health. Healthy Water, Healthy People helps educators address science standards through interactive activities that interpret water quality concepts and promote diverse learning styles, with foundations in the scientific method. This Guide contains 25 original activities that link priority water quality topics to real-life experiences of educators and students.

Healthy Water, Healthy People Testing Kit Manual

This 100-page technical reference manual is an excellent companion text that supports all of the Healthy Water, Healthy People publications and materials. The purpose of this manual is to serve as a technical reference for the Healthy Water, Healthy People Water Quality Educators Guide and the Healthy Water, Healthy People Testing Kits, yielding in-depth information about eleven water quality parameters. The manual answers questions about water quality testing using technical overviews, data interpretation guidelines, case studies, chemical formulas, testing kit activities, laboratory demonstrations, and much more.

REGISTRATION FORM

Due by Mar 1 for Mar 12 workshop
Due by June 1 for June 11 workshop
Due by July 27 for Aug 3 workshop
Due by Nov 9 for Nov. 19 workshop
Minimum of 12 participants required.
 No refunds after due date
